

ANNEX 2: SCHEDULE OF REQUIREMENTS

Rakeen Uptown Development LLC (Tbilisi Mall) is searching for a Elevators Access System installation service provider.

The Access System should be installed on 12 (twelve) Elevators. The access system should have the relevant software. The software programing should be managed from the Owner Company Server Room.

The software should record the following data:

- Access Card number
- Access Card owner name
- Access Card usage date
- Access Card usage time

The software should have a function of disabling the lost/damaged access card with the following replacement function. Also the software or device should be equipped with the so called time switch (For the set period of time the elevator should be used w/o access cards, however after expiration of the period, the access system should be activated automatically).

In case the device requires the manufacturer license, the bidder should take into consideration the fact, that there will be a request for future adding of the devices (approx. 6-7 pcs).

The bidders offer should include all the related expenses for this service provision.

The bidders should provide all available devices options with prices for the required service.

The bidders should provide the period of fulfilling the requirement (timeline of works).

The bidders should provide the warranty period for the devices and services.
