

დაბალყელიანი ფეხსაცმლის ნიმუში და ტექნიკური მონაცემები

MATERIAL

Anti-puncture midsole material: composite

Upper material: split leather

Toe cap material: composite

Outsole material: double density polyurethane

Lining material: polyester mesh

FEATURES

Industry: Mining and quarrying, Heavy industry, Construction

Item weight: 610 g

STANDARDS

EN ISO 20345:2011 / S3 SRC

DESCRIPTION

Classic safety low shoes with a composite toe cap, which protects against compression with a force of up to 15 kN or the fall of a load weighing up to 20 kg from a height of 1 m. The antistatic robust outsole made of double-density polyurethane guarantees not only comfort but also safety thanks to composite anti-puncture midsole and the anti-slip properties of the sole, which is also resistant to oils and abrasion. The water-resistant upper is made of natural split leather and the inner lining is made of breathable polyester. The shoes do not contain any metal parts and therefore are an ideal solution for areas equipped with a safety frame.
